Reflection Paper over Community Engagement Project (Team Presentation)

Provide the impact from your team online presentation:
1. **Impact on your own understanding in developing an online presentation**
2. **Impact on the team-working practices**
3. **Impact on your target audiences – high school students**

You should have gained some additional insight into what needs to be considered when presenting an educational video clip that is to be delivered online. The experience you gained by working with your teammates would be shared in this reflection paper.

Therefore, in a double-spaced paper, with 1-2 pages limitation, describe what changes/considerations/modifications you will need to make to have your team working more effectively. This is intended, not as a burden of a paper to turn in, but as an intentional juncture in the process of reflection that most accurately addresses the needs of community partnerships to assist in high school students. As a result, the Rubric for the expected performance is simple; but it creates the opportunity for better reflection on what changes/modifications are critical to your future community engagement.
