ABOUT OUR NURSING PROGRAM: Rural health care and access to care are major concerns for society today, which makes the small community of Huntsville a great place for SHSU Nursing students to gain valuable experience. Through a Fellowship offered by the Huntsville Memorial Hospital, our students can work - with pay - in highly specialized areas such as ICU, labor and delivery, and OR/PACU. They can continue to work and learn for up to six months after graduation with a two year work agreement. The SHSU Nursing Program is an exciting program that continues to grow and provide many opportunities for students to impact lives. If nursing is your calling, come learn with us!
