

Professor Committed to Ending Sexual Violence Appointed to Regional Board

By Natasha Rider

Charmin White, MSN, Ed RN, C-A SANE, C-P SANE, clinical assistant professor of nursing has been appointed as Region D Representative to the Texas Association Against Sexual Assault (TAASA) Board.

TAASA's goal is to lead the statewide community to be free of sexual violence through education, prevention and advocacy. One such application is the Texas Safety University App, "TX Safety U," which can connect college students, faculty and staff with sexual assault victim assistance on campus and in the community. According to TAASA, "prior to this app, if a student needed assistance after an assault they were left to navigate through complex college and university websites for information. TX Safety U puts this information in the hands of the student in an easy to access format on their smartphone."

TX Safety U is available to download at no cost for Android and Apple devices at Google Play and iTunes stores.
