

A THESIS PROSPECTUS

Submitted to the College of: _____

Candidate: _____

Degree in Progress: _____

Major: Mathematics Minor: (None)

Proposed Topic: _____

Organize a detailed prospectus around the following points and attach the typed original to this form:

- I. Explain the purpose of your project and what you hope to develop in your research.
(Describe the background material. Develop a 4-6 page introduction to your project.)
- II. Outline your proposed procedure and method(s) of investigation.
(What questions will you explore? Elaborate on the techniques and put them in a firm mathematical foundation.)
- III. Indicate the relationship of your study to relevant research and findings by scholars in your general area of concentration. *(Provide an annotated bibliography, discussing 6-10 references.)*
- IV. Comment on all source materials and/or facilities available for the successful completion of your research.
