Information Technology Change Management Policy: IT-09

Introduction:

From time to time each information technology resource element requires an outage for planned upgrades, maintenance or fine-tuning. Additionally, unplanned outages may occur that may result in upgrades, maintenance or fine-tuning. Managing these changes is a critical part of providing a robust and valuable information technology resources infrastructure.

The purpose of the Information Technology Change Management policy is to manage changes in a rational and predictable manner so that SHSU constituents can plan accordingly. Changes require serious forethought, careful monitoring, and follow-up evaluation to reduce negative impact to the user community and to increase the value of Information Technology Resources.

Scope:

The SHSU Information Technology Change Management policy applies to all individuals that install, operate or maintain SHSU information technology resources.

Policy Statement:

1. Changes to SHSU information technology resources such as operating systems, computing hardware, networks, and applications are subject to this policy and must follow the IT@SAM Change Management Procedures.
2. All changes affecting computing environmental facilities (e.g., air-conditioning, water, heat, plumbing, electricity, and alarms) need to be reported to or coordinated with the appointed IRM liaison of the change management process.
3. A Change Advisory Board (CAB) appointed by the designated IRM must meet regularly to review change requests and to ensure that change reviews and communications are being satisfactorily performed.
4. A formal written change request must be submitted for all changes, both scheduled and unscheduled.
5. All scheduled change requests must be submitted in accordance with change management procedures so that the CAB has time to review the request, determine and review potential failures, and make the decision to allow or delay the request.
6. Each scheduled change request must receive formal CAB approval before proceeding with the change.
7. The appointed IRM liaison of the CAB may deny a scheduled or unscheduled change for reasons including, but not limited to, inadequate planning, inadequate back-out plans, the timing of the change will negatively impact a key business process, or if adequate resources cannot be readily available.
 - a. System owners and/or system administrators may appeal a denied CAB

- change request to the IRM.
- b. The IRM will convene the impacted members of the CAB, system owners, system administrators and other stakeholders as agreed by the IRM and System Owner(s) to make the final determination for implementing or not implementing the requested change.
8. Customer notification must be completed for each scheduled or unscheduled change following the steps contained in the Change Management Procedures.
 9. A Change Review must be completed for each change, whether scheduled or unscheduled, and whether successful or not.
 10. A Change Management Log must be maintained for all changes. The log must contain, but is not limited to:
 - a. Date of submission and date of change;
 - b. Owner and custodian contact information;
 - c. Nature of the change; and
 - d. Indication of success or failure including lessons learned.
