STA/MTH 169: section 05, credit:3, Fall 2007

ELEMENTARY STATISTICS

Instructor:

Dr. Ferry Butar, Lee Drain Building 439C, Phone 294-1596.
Email: butar@shsu.edu
Homepage: http://www.shsu.edu/mth_fbb

OFFICE HOUR:

Tuesday and Thursday: 8:15-9:15, and 1:00-2:00 p.m.;
Monday and Wednesday: 8:30-10:00 a.m., and 1:30 -2:00 p.m or by appointment.

CLASS HOUR:

LDB 218: Tuesday and Thursday: 2:00-3:20 p.m.

REQUIRED MATERIALS:

Calculator: TI-83/ plus or TI-84 plus.

COURSE DESCRIPTION:

This course introduces the fundamentals of statistical theory and its Inference, in the form of estimation, decisions, and predictions, plays and important role in everyday life as well as in scientific and other organized research. In many cases, a knowledge of probability and statistics will allow a quantitative assessment of the risk involved with each inference and, allows for more intelligent actions. Sta/Math 169 is designed as both a terminal course for those not likely to be intimately involved in research in their academic fields, and as an introductory course for those who are.
COURSE OUTLINE:

I will cover most of the sections in Chapters 1 through chapter 10.

Approach:

Lectures on New Concepts and applications,
Assigned problems for experience and familiarities with techniques,
Classroom discussions,
Examinations to demonstrate understanding and ability to utilize methods.

GRADING POLICY:

During the semester, there will be homeworks, quizzes, three in-class exams and a cumulative final exam. You are allowed to use one (8½ × 11) of notes.

Any student who does not take an exam at the scheduled time without prior consent of the instructor will receive a grade of zero on that exam. If any student feels that a sudden illness is sufficiently extreme to warrant a make-up exam, the instructor must be provided with documentation prepared by an appropriate medical authority.

*Homeworks and Quizzes:* Homework is collected every two-week. In order to assess your progress with the homework I will set a quiz on every two-week, except when there is an exam on that day. This quiz will consist of one of the homework questions which you should have already done. Because of this, you won’t have much time to do the quiz and if you haven’t worked the problem out previously, you will probably not have enough time.

<table>
<thead>
<tr>
<th>Item</th>
<th>Total point</th>
<th>Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>5 hw</td>
<td>50</td>
<td>every two-week</td>
</tr>
<tr>
<td>5 quiz</td>
<td>50</td>
<td>every two-week</td>
</tr>
<tr>
<td>First Mid-Term Exam</td>
<td>100</td>
<td>Tuesday, Sept 18, 2007</td>
</tr>
<tr>
<td>Second Mid-Term Exam</td>
<td>100</td>
<td>Tuesday, October 23, 2007</td>
</tr>
<tr>
<td>Third Mid-Term Exam</td>
<td>100</td>
<td>Tuesday, December 4, 2007</td>
</tr>
<tr>
<td>Final Exam</td>
<td>200</td>
<td>Thursday, December 13, 2006</td>
</tr>
</tbody>
</table>

*Notes:*
- All exams are closed book.
- You may bring a single two-sided page of notes, excluding graphs, tables, and charts.
Your final course will be determined by your cumulative score out of a maximum possible of 600. There is no set formula used to determine the letter grade for the course, but the following are some guidelines,

<table>
<thead>
<tr>
<th>Total point</th>
<th>Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>540 − 600</td>
<td>A</td>
</tr>
<tr>
<td>480 − 539</td>
<td>B</td>
</tr>
<tr>
<td>420 − 479</td>
<td>C</td>
</tr>
<tr>
<td>360 − 419</td>
<td>D</td>
</tr>
<tr>
<td>≤ 359</td>
<td>F</td>
</tr>
</tbody>
</table>

**Attendance:**

Attendance is very important. Class attendance is a requirement of this course. Regular attendance will indicate the amount of interest and effort a student is willing to exert in learning. Any student will be allowed 2 class absences without penalty. Any absences over 2 classes will result in final grade reductions. Your final grade will be lowered 10 points for each absence over 2 times.

**ACADEMIC HONESTY:**

All work that is handed in for evaluation is to reflect solely your individual performance. Cheating will not be tolerated. A violation will result a grade of F for the semester.

**STUDENT ABSENCES ON RELIGIOUS HOLY DAYS POLICY:**

Section 51.911(b) of the Texas Education Code requires that an institution of higher education excuse a student from attending classes or other required activities, including examinations, for the observance of a religious holy day, including travel for that purpose. A student whose absence is excused under this subsection may not be penalized for that absence and shall be allowed to take an examination or complete an assignment from which the student is excused within a reasonable time after the absence.

University policy 861001 provides the procedures to be followed by the student and instructor. A student desiring to absent himself/herself from a scheduled
class in order to observe (a) religious holy day(s) shall present to each instructor involved a written statement concerning the religious holy day(s). This request must be made in the first fifteen days of the semester or the first seven days of a summer session in which the absence(s) will occur. The instructor will complete a form notifying the student of a reasonable timeframe in which the missed assignments and/or examinations are to be completed.

LEARNING DISABILITIES:

SHSU adheres to all applicable federal, state, and local laws, regulations, and guidelines with respect to providing reasonable accommodations for students with disabilities. If you have a disability that may affect adversely your work in this class, then I encourage you to register with the SHSU Counseling Center and to talk with me about how I can best help you. All disclosures of disabilities will be kept strictly confidential. NOTE: no accommodation can be made until you register with the Counseling Center.

How to beat the system:

I want to give you an incentive to keep working and learning right through the course. To do this there are Bonus Points after each exam and Final Bonus Points at the end of the course. After each test, if you improve your score from the last exam, I will add a bonus of 50% of your improvement to your final score for the test. The bonus points get added on at the end of the course so if you score 80 on the first exam, 86 in the second exam and 88 in the third exam then you would get 3 bonus points for the second exam and 1 bonus point for the third, since the three bonus points were not added directly to the score for the second. You won’t loose bonus points if your score goes down on subsequent exams. Also, at the end of the course, if each test score is higher than the previous one then I’ll add a final bonus of 10 points to your total accumulated points.
