

The C Song
By James Spurlin

You hang out at the back of the equation
You're only around in anti-derivation
What is your number C?
 π (symbol??)/4 or 103,
Or is the number of fish in the sea?
Why don't you just tell me?

(Chorus)
Cause your C....
You're only a constant
A constant pain in my neck.

Your C.....
We don't hate you,
but your importance we forget.

The curves of your body are pullin' me in.
If you were a babe, where would I begin?
I guess I'd ask you to go to the beach,
OH would you ever date me????????

NO Cause your C.....
You're only a constant
A constant pain in my neck.

Your C.....
We don't hate,
Your importance we forget.....
