Woods further noted that the courses and degrees are already being offered at TUC. This approval would finalize the degrees at TUC.
7. & 8. Technology and Finance Committee
The rising cost of electricity was discussed. Measures to reduce usage include close monitoring of room utilization, raising temperatures in unused rooms, and raising the temperature in the entire building by one degree. TUC projections for electricity come from District Office resources. However, based on rising costs, TUC may expect $15,000 shortfall by August 31, 2007 in the electricity budget account. Council members Hodge, Parker, North, Bradley and Endler all reported their university's strategy for managing utilities in the current market.

Head presented TUC 2008 Budget proposal. It included a 5% pay raise and a recommended increase in the Technology budget from $150,000 to $211,575. After discussion, the decision was to reduce the technology back to $150,000. The motion to approve the 2008 Budget as discussed and revised was made by Parker, seconded by Woods, and unanimously approved.

Each university discussed their strategies for facing the budgeting challenges of their respective university.

Finance Committee members will address the following issues: rising utility costs; technology funding; establishing an appropriate reserve.

Westerfeld listed current emergency projects at TUC that NHMCCD is funding: repair and replacement of pressure valves on boilers; water traps at floor drains; air conditioning system chillers' motors; fans; couplings; sprinkler system; and fire panel.

9. NHMCCD Update
Head reported on the continued growth of NHMCCD. Challenges to address that growth include securing funding for many priorities: new building space, upgrading/renovating older facilities, increasing faculty positions, and starting up new college centers.
