

Do you know how to enrich a class by including technology?

Have you successfully used Web 2.0 tools in the classroom?

Would you like to share your great ideas for using computers to help students learn?

The Sam Houston State University College of Education will be presenting the second
TECHNOLOGY, EDUCATION AND COMMUNICATION CONFERENCE (TECC)

October 9th, 2010

BRIDGING THE WEB 2.0 GAP

We are looking for technology leaders who can share their methods and lessons with other educators to enrich and enliven student learning.

A downloadable presenter application form has been set up at [Submit Proposals](#).

Presentation proposals are requested by **June 15th** of this year, to be submitted to:

shsutecc@shsu.edu

We are especially interested in workshops which demonstrate how to use cell phones to teach in class, how to bring a global perspective into the classroom with technology and how to incorporate Web 2.0 tools into lesson plans.

Several of last year's presenters offered feedback concerning our fees, and we have listened.

SHSU understands that when you present a workshop, you are not able to also attend the same number of workshops as regular attendees. To recognize this difference in participation and also to thank-you for providing the great service you do, we are offering presenters a reduced registration fee.

Regular attendees will be charged \$75/person.

Presenters, however, will only be charged \$25/person.

And that still includes lunch and CPE credit!

Only individual presenters may register at the reduced price, so associates who wish to attend with you will need to register as regular attendees. However, we have also added a **group discount of 10%** for four or more attendees from the same Independent School District.

Questions regarding presentation proposals or registrations can be emailed to TECC Communication Coordinator Diane Hudson at shsutecc@shsu.edu
