

Running Paper on the Visible Spectrum

1. Which end of the visible spectrum corresponds to shorter wavelength? State color.
2. Rate your confidence.
(1-not confident, 2-somewhat confident, 3-very confident).

Discuss your answer with the person sitting next to you.

3. After discussing with another person, modify your answer and confidence level, if necessary.
-
4. Which end of the visible spectrum corresponds to lower photon energy? State color.
 5. Rate your confidence.
(1-not confident, 2-somewhat confident, 3-very confident).
