

**Marlee Clark, Kourtney Lorenz, Brynn Wittie**

**Livestock Nutrition**

**Unit 9.5 – Feeding practices based – on nutritional requirements**

**Instructions:**

The students will be broken up into groups and each group will be given a life stage or situation of a horse, and they will have to come up with the best feeding practices for that life stage of that horse. The teacher will need to give each group a different life stage or situation of a horse, such as weanling, yearling, growing horse, performance horse, breeding horses, and senior horses. The students will do research on the computers and will need to create a poster with the information and pictures of the horse and what the feed will look like that they would have to be buying for the horse. Each student will be graded on how much worked they did with the group, and each student will have to have the same amount of speaking time. Once the students have finished their poster they will present the information to the class in the order of which the animals life stage, that way the whole class can hear the information.

**Materials:**

- List of types of horses
- Computers with internet
- Printers
- Poster boards
