

## Student Growth Data

The data below reflect the achievement of improvement of students in the classrooms of beginner teachers from the preparation program.

Beginner teachers of record employed within a Texas public school and enrolled in an EPP or who finished an EPP program within the five years prior to their first year as a certified teacher of record were eligible for inclusion. The beginner teachers had fewer than three years of experience as a certified teacher. Included are those teachers who taught Self-Contained, English Language Arts, and Mathematics with STAAR Annual Growth Points. Each student’s STAAR Annual Growth Points associated with each teacher is used by TEA to assess whether the teacher met the SBEC standard.

The table below shows the percentage of teachers who had students whose scores resulted in a met standard rating and the percentage whose did not.

Total Met/Did Not Meet Standard

% Met Standard	% Did Not Meet Standard
81% (182)	19% (43)

The table below shows individual candidate demographic data and if they met or did not meet standard for the academic year 2024-2025.
