The concentration in safety management provides knowledge and proficiency for students to make workplaces safer and to address hazardous situations and emergency events. Through hands-on assignments, students will be equipped with the knowledge needed to anticipate, recognize and evaluate potential hazards and enhance workplace safety.
Program Educational Objectives

- Apply concepts of safety and risk management to prioritize resources, reduce costs and minimize occupational hazards.
- Anticipate, recognize, evaluate, and control hazardous conditions that affect workers, properties and/or work environments.
- Demonstrate safety leadership skills, teamwork, and effective communication skills.
- Identify and apply applicable safety standards, regulations, and codes in industrial settings.

“In the ever-growing world of engineering – SHSU found a way to make its program unique to the students.

My professors were huge advocates in my journey and never failed to answer a call, even after I graduated. I was provided with resources, opportunities, and funding from the ETEC department to pursue the career I currently have.

The experience I had at SHSU was one-of-a-kind and in many ways thanks to the ETEC department.”

- Shani Gomez, Associate Safety Professional (ASP)
