DEPARTMENT OF ECONOMICS AND INTERNATIONAL BUSINESS

PYTHON FOR ECONOMICS AND FINANCE WITH AMAZON SAGEMAKER

- Learn the most important programming language in the world with business practitioners.
- This five-day course (one hour per day) introduces Python using basic examples from Economics and Finance and is hosted in the cloud using Amazon SageMaker.
- After learning Python basics like data analysis and visualization, participants will access stock data with a web API and apply a simple algorithmic trading script.
- The class does not require any prior programming, statistics or cloud experience.
- Students and faculty from all departments are welcome.
- To register email Dr. Kyle Jones at ktj012@shsu.edu

Dr. Kyle Jones will teach this course. He currently works at Amazon Web Services and it is also a lecturer in the Department of Economics and Intl. Business. He holds a B.A. in Economics from Oklahoma State University, Masters in Public Policy from Harvard University and a Doctorate of Engineering and Engineering Management from The George Washington University. Before Amazon Web Services, he worked as a Data Science Advisor and Solution Architect for ExxonMobil and in the U.S. Department of State.
