Office of Academic Planning and Assessment

A Report of the Assessment of Written Communication (AWC)

College of Arts and Media and
College of Humanities and Social Sciences

2019-2020
Description of Assessment of Written Communication (AWC)

Each academic year, approximately 500 student writing artifacts are collected and assessed using a locally-developed writing rubric. This rubric was developed by faculty with expertise in teaching and assessing student writing and is assumed to have content related validity (Banta & Palomba, 2015). Over a three-year period, each academic college at SHSU will participate in the Assessment of Written Communication (AWC) and submit artifacts for scoring. These student artifacts either come directly from courses within those colleges or from required capstone projects; therefore, the artifacts represent authentic student work (Banta & Palomba, 2015; Kuh et al., 2015).

The student data presented within this report reflect student performance regarding the Texas Higher Education Coordinating Board’s Core Learning Objective of Communication Skills (THECB, 2021). The THECB (2021) defines Communication Skills as “effective development, interpretation, and expression of ideas through written, oral and visual communication.” Data from this assessment may therefore be used to address the written communication element of the broader concept of Communication Skills. These data should be used in conjunction with other data to fully understand student knowledge and ability regarding this Core Learning Objective.

Methodology

A total of 521 artifacts were submitted from upper division courses from three of the five departments in the College of Arts and Media (125) and the College of Humanities and Social Sciences (396), although some were not scored. Of the artifacts not scored, 11 were either anchor papers used for norming or had other issues that prevented them from being included. Therefore, a total of 510 artifacts from both colleges for 2019-2020 were scored as part of this writing assessment.

Student writing artifacts were scored by faculty and staff volunteers during a two-day virtual scoring session in June 2021 using a locally-developed writing rubric. This rubric was divided into four separate domains: (1) Ideas/Critical Thinking/Synthesis; (2) Style; (3) Organization; and (4) Conventions. A copy of this rubric is provided in the Appendix. Each domain was scored individually from 1 to 4, with 1 being the lowest and 4 being the highest. Each artifact was reviewed by two raters, with a third rater introduced when the scores were too far out of agreement (i.e., a score of 1 and 4 for the same domain). The third rater would only score those domains that were not in agreement and the two closest scores would be kept. The individual domain scores for each student writing artifact were then averaged together to provide a total average score for the artifact.

Score Reliability

Intraclass correlational coefficients (ICCs) were calculated to determine the level of inter-rater agreement for each domain of student writing, as well as the overall average scores (Fleiss, 2003; Shrout & Fleiss, 1979). According to Cicchetti (1994), ICC agreement values below .40 are to be interpreted as demonstrating poor agreement, from .40 to .59 as demonstrating fair agreement, .60 to .74 as demonstrating good agreement, and .75 and above as demonstrating excellent agreement. The agreement values for three of the individual writing domains were in the fair range, while the agreement value for the style domain was approaching the fair range. The overall average score was .51, indicating fair agreement. A complete breakdown of the ICC agreement values can be found in Table 1.
### Table 1

**Breakdown of ICC Agreement by Domain Area**

</tbody>
</table>

### Results

Descriptive statistics are provided of the average student score for each domain, as well as the overall average, for each College and Department participating within this assessment. Comparisons to previous data are also provided for each participating college and department. The College of Arts and Media was previously evaluated in 2017-2018, and the College of Humanities and Social Sciences was previously evaluated in 2016-2017. A full breakdown of College-level data can be found in Table 2. A breakdown of Department-level data for the College of Arts and Media can be found in Table 3. A breakdown of the Department-level data for the College of Humanities and Social Sciences can be found in Table 4.

Writing Assessment Rubric
Writing Assessment Rubric

This rubric asks you to identify features of the writing present in the sample. You should apply the numerical score based on degree of presence of the characteristic features. The writing features selected for the rubric are those most likely present in any disciplinary writing sample and represent a writing level expected of a senior-level college student.

Legend: N/A = Not Applicable
1 = few features are present
2 = features are not often present
3 = features are often present
4 = features are most always present

<table>
<thead>
<tr>
<th>CATEGORY</th>
<th>CHARACTERISTIC FEATURES</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Ideas/Critical Thinking/Synthesis</strong></td>
<td>• Central subject or argument of the assignment is easily identified, clearly emphasized, consistent with the evidence, and intriguing</td>
</tr>
<tr>
<td></td>
<td>• Reasoning is fully developed throughout the assignment with logical examples, details, and evidence where and as appropriate</td>
</tr>
<tr>
<td></td>
<td>• Assignment contains information that addresses counterarguments, biases, or reader’s expectations as appropriate</td>
</tr>
<tr>
<td><strong>Style</strong></td>
<td>• Sustained awareness of audience throughout the assignment</td>
</tr>
<tr>
<td></td>
<td>• Writing tone suits the audience and enhances the assignment’s purpose</td>
</tr>
<tr>
<td></td>
<td>• Sentence structure varies according to the content, purpose, and audience</td>
</tr>
<tr>
<td></td>
<td>• Sentences are consistently clear and logical</td>
</tr>
<tr>
<td></td>
<td>• Word choice is appropriate to the writing task</td>
</tr>
<tr>
<td><strong>Organization</strong></td>
<td>• Text is purposefully organized and substantially developed in a way that clarifies the argument and enhances style</td>
</tr>
<tr>
<td></td>
<td>• Arrangement of ideas (overall structure) is clear, logical, and compelling as appropriate to the assignment; the reader moves through the text easily</td>
</tr>
<tr>
<td></td>
<td>• Internal structure is cohesive and coherent; text flows and ideas are clearly and logically connected</td>
</tr>
<tr>
<td></td>
<td>• Transitions used appropriately</td>
</tr>
<tr>
<td></td>
<td>• Format is appropriate as defined by the assignment</td>
</tr>
<tr>
<td><strong>Conventions</strong></td>
<td>• Grammar and mechanics support the reader’s understanding of the writer’s purpose without distracting errors</td>
</tr>
<tr>
<td></td>
<td>• Documentation style is consistent, if appropriate to assignment</td>
</tr>
<tr>
<td></td>
<td>• Sources, when appropriate, are effectively integrated into the body of the assignment</td>
</tr>
<tr>
<td></td>
<td>• Minor errors do not interfere with readability or damage the writer’s credibility (as appropriate to the assignment parameters)</td>
</tr>
</tbody>
