CAT Institutional Report

Spring 2021: All Students

**CAT Overview: Descriptive Statistics for CAT Total Score
Sam Houston State University: Spring 2021: All Students**

	N	Min.	Max.	Mean	Std. Dev
CAT Total Score	264	3.00	25.00	12.48	4.50

	N	Min.	Max.	Mean	Std. Dev
Time Spent (in minutes)	264	4	295	43	30

CAT Demographics: Descriptive Statistics for Sample

		Freq.	Freq. %
Gender	Male	58	22.3%
	Female	202	77.7%
Class Standing	Freshman	0	0.0%
	Sophomore	9	3.4%
	Junior	55	21.0%
	Senior	198	75.6%
Class	Undergraduate	262	99.6%
	Graduate	1	0.4%
Age	≤ 20 years	30	12.0%
	21-25 years	185	74.0%
	≥ 26 years	35	14.0%

		Freq.	Freq. %
Race**	White	163	61.7%
	Black or African American	53	20.1%
	American Indian or Alaska Native	3	1.1%
	Asian	12	4.5%
	Native Hawaiian or Other Pacific Islander	0	0.0%
	Other Race	20	7.6%

**The cumulative percent may exceed 100% as students are allowed to select more than one category.

		Freq.	Freq. %
Proficiency with the English Language*	Excellent	194	73.8%
	Very Good	54	20.5%
	Good	15	5.7%
	Fair	0	0.0%
	Poor	0	0.0%

		Freq.	Freq. %
Spanish/Hispanic/Latino Ethnicity	79	29.9%	
Considered English primary language?	233	88.3%	

* Self-rated

CAT Breakdown: Frequency of Points Awarded for Each Question

Sam Houston State University: Spring 2021: All Students

	Skill Assessed by CAT Question	Points Awarded	Freq.	Institution
Q1	Summarize the pattern of results in a graph without making inappropriate inferences.	0	58	22.0%
		1	206	78.0%
Q2	Evaluate how strongly correlational-type data supports a hypothesis.	0	110	41.7%
		1	90	34.1%
		2	29	11.0%
		3	35	13.3%
Q3	Provide alternative explanations for a pattern of results that has many possible causes.	0	156	59.1%
		1	65	24.6%
		2	43	16.3%
		3	0	0.0%
Q4	Identify additional information needed to evaluate a hypothesis.	0	178	67.4%
		1	78	29.5%
		2	8	3.0%
		3	0	0.0%
		4	0	0.0%
Q5	Evaluate whether spurious information strongly supports a hypothesis.	0	91	34.5%
		1	173	65.5%
Q6	Provide alternative explanations for spurious associations.	0	84	31.8%
		1	81	30.7%
		2	90	34.1%
		3	9	3.4%
Q7	Identify additional information needed to evaluate a hypothesis.	0	243	92.0%
		1	21	8.0%
		2	0	0.0%
Q8	Determine whether an invited inference is supported by specific information.	0	110	41.7%
		1	154	58.3%
Q9	Provide relevant alternative interpretations for a specific set of results.	0	158	59.8%
		1	106	40.2%
		2	0	0.0%
Q10	Separate relevant from irrelevant information when solving a real-world problem.	0	2	0.8%
		1	22	8.3%
		2	56	21.2%
		3	109	41.3%
		4	75	28.4%
Q11	Use and apply relevant information to evaluate a problem.	0	91	34.5%
		1	161	61.0%
		2	12	4.5%
Q12	Use basic mathematical skills to help solve a real-world problem.	0	57	21.6%
		1	207	78.4%
Q13	Identify suitable solutions for a real-world problem using relevant information.	0	95	36.0%
		1	113	42.8%
		2	39	14.8%
		3	17	6.4%
Q14	Identify and explain the best solution for a real-world problem using relevant information.	0	124	47.0%
		1	38	14.4%
		2	0	0.0%
		3	28	10.6%
		4	65	24.6%
		5	9	3.4%
Q15	Explain how changes in a real-world problem situation might affect the solution.	0	244	92.4%
		1	12	4.5%
		2	8	3.0%
		3	0	0.0%

Institutional/Departmental Profile

Frequency of Points Awarded on the CAT
Sam Houston State University: Spring 2021: All Students

Questions 1-4 present students with a scenario and graph. In this section of questions, students will be asked to summarize the trend of the graph, evaluate the strength of the graph in supporting an argument, provide potential alternative explanations for the trend of the graph, and identify additional information that would be useful to more fully understand the situation. This set of questions aligns with CAT App Skill Set 1.

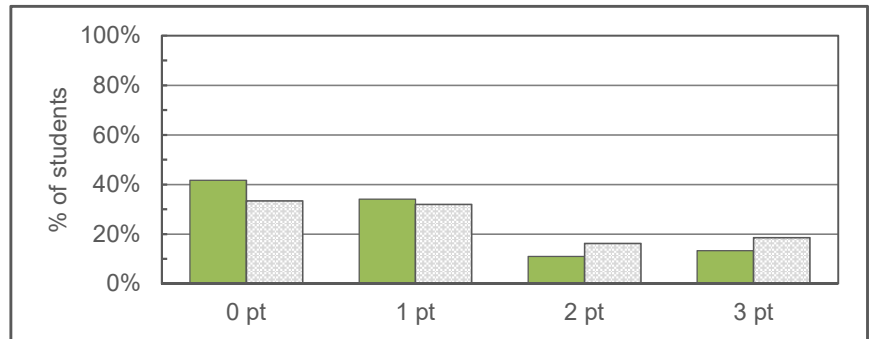

Q1 Summarize the pattern of results in a graph without making inappropriate inferences.

A point is awarded for responses that describe the trend in the graph AND do not attribute the findings to a single cause when there are a variety of potential explanations.

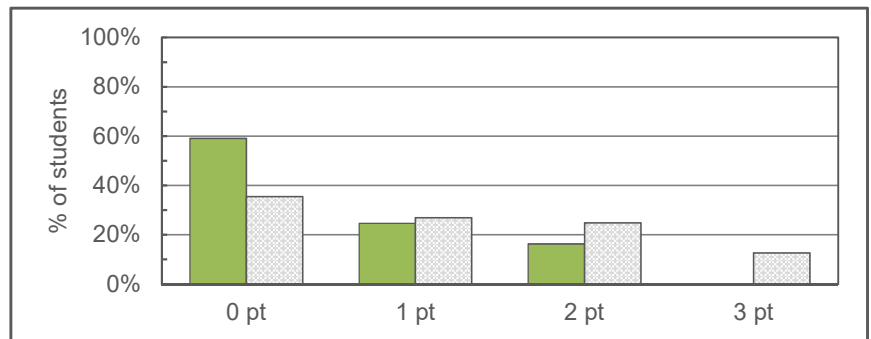

Q2 Evaluate how strongly correlational-type data supports a hypothesis.

Points are awarded for responses that explain the limitations of the correlation observed and the possibility of alternative explanations.

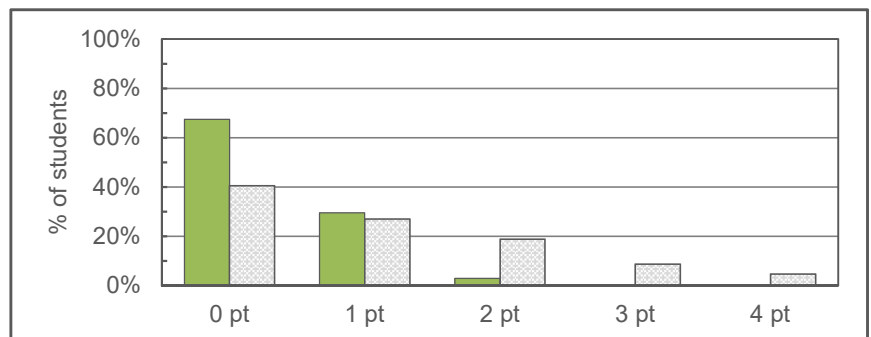

Q3 Provide alternative explanations for a pattern of results that has many possible causes.

Points are awarded for the number of viable alternative explanations provided for the reported findings.

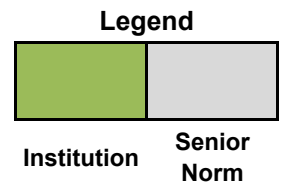

Q4 Identify additional information needed to evaluate a hypothesis.

Points are awarded for clearly identifying types of information needed to evaluate competing hypotheses.

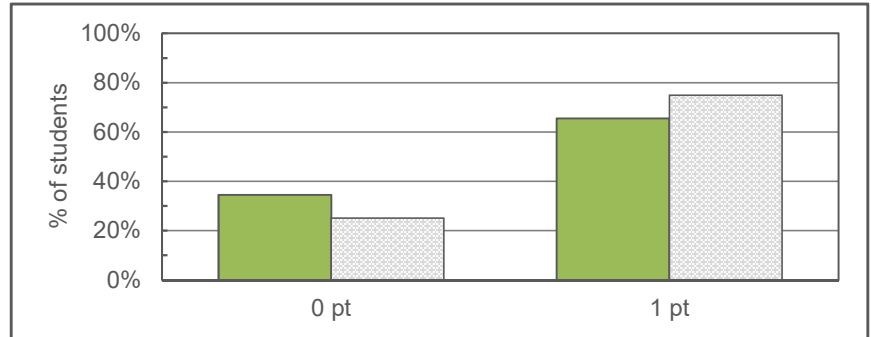

Frequency of Points Awarded on the CAT
Sam Houston State University: Spring 2021: All Students

Questions 5-7 present students with a hypothesis and two pieces of evidence. In this section of questions, students will be asked to evaluate the strength of the evidence in supporting a hypothesis, provide potential alternative explanations for the evidence, and identify additional information that would be useful to more fully evaluate the hypothesis. This set of questions aligns with CAT App Skill Set 1.

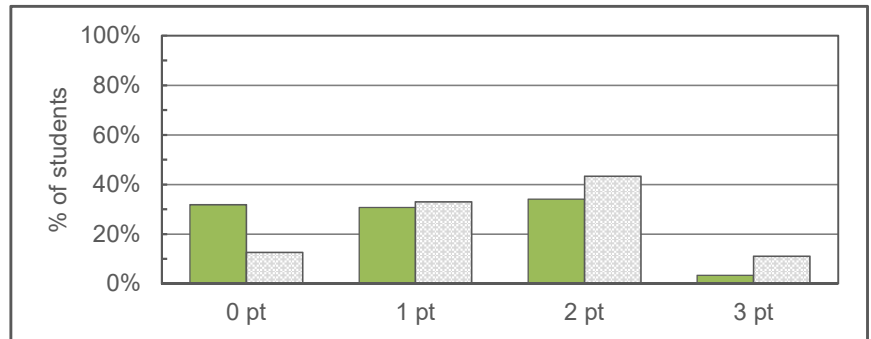

Q5 Evaluate whether spurious information strongly supports a hypothesis.

A point is awarded for recognizing that spurious information does not strongly support a hypothesis.

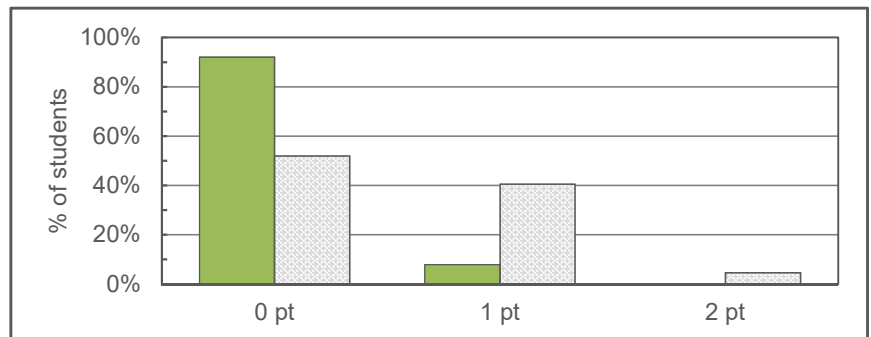

Q6 Provide alternative explanations for spurious associations.

Points are awarded for explaining the spurious nature of the evidence.

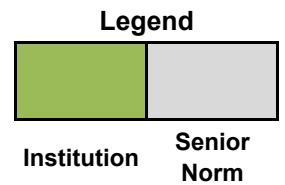

Q7 Identify additional information needed to evaluate a hypothesis.

Points are awarded for clearly identifying new information that needs to be obtained to evaluate the hypothesis.

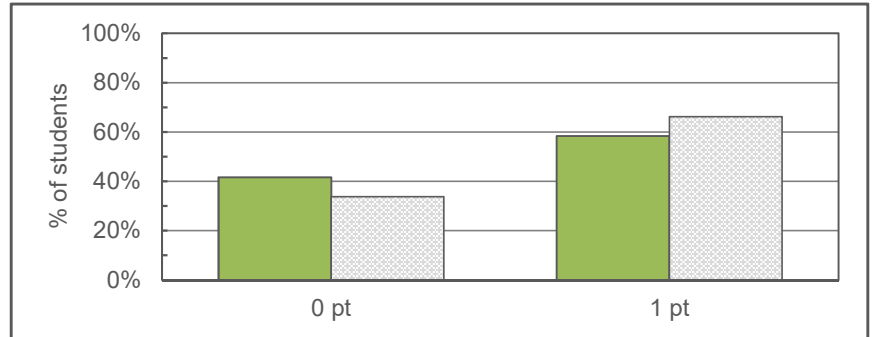

Frequency of Points Awarded on the CAT
Sam Houston State University: Spring 2021: All Students

Questions 8-9 present students with the results of a survey and a corresponding marketing claim. In this section of questions, students will be asked to evaluate whether the marketing claim is supported by the results of the survey and to provide potential alternative explanations for the results of the survey. This set of questions aligns with CAT App Skill Set 1.

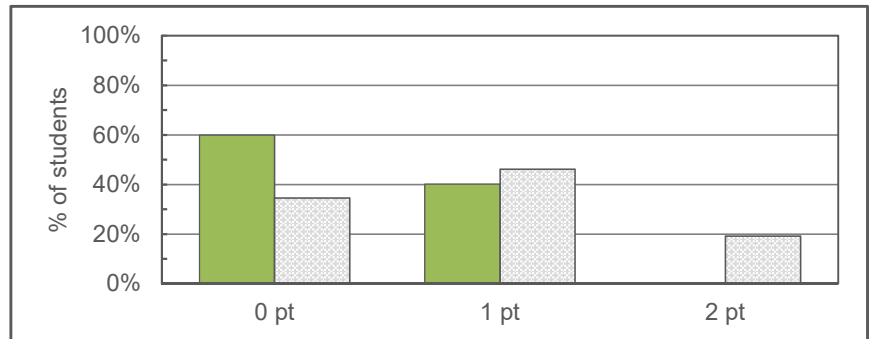

Q8 Determine whether an invited inference is supported by specific information.

A point is awarded for indicating the provided evidence does not strongly support the hypothesis.

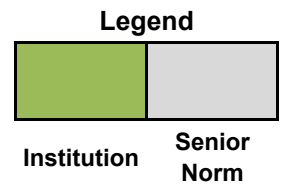

Q9 Provide relevant alternative interpretations for a specific set of results.

Points are awarded for providing alternative interpretations of the findings.

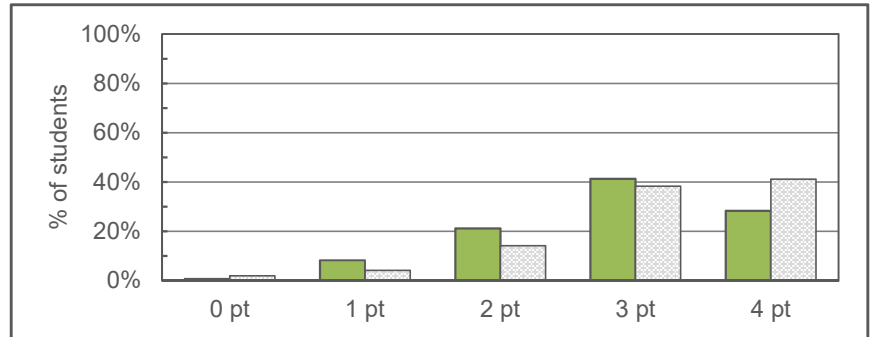

Frequency of Points Awarded on the CAT
Sam Houston State University: Spring 2021: All Students

Questions 10-15 present students with a real-world problem-solving task. In this section of questions, students will be asked to evaluate the relevance of available information, read relevant information, evaluate a suggested solution based on relevant information, solve a basic mathematical problem needed to solve the problem, identify a group of appropriate solutions, identify the best solution for a the problem situation, and identify changes to the problem situation that would change the solution. This set of questions aligns with CAT App Skill Set 2.

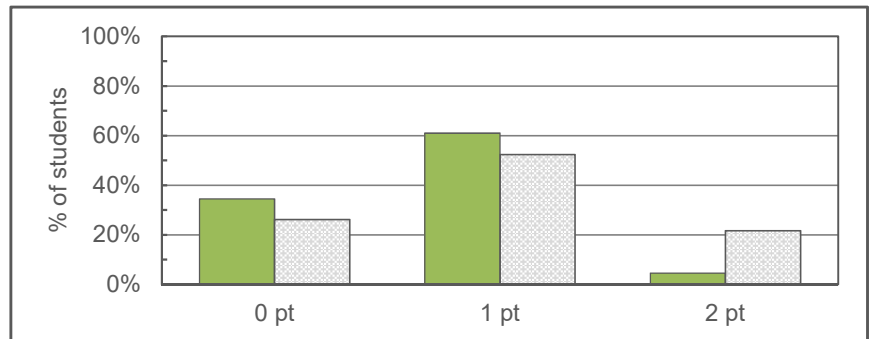

Q10 Separate relevant from irrelevant information when solving a real-world problem.

Points are awarded for correctly identifying information relevant to solving the problem based on the descriptive titles of the available information.

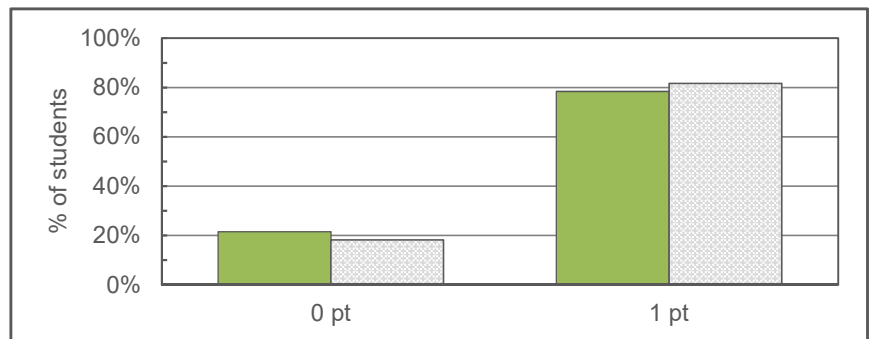

Q11 Use and apply relevant information to evaluate a problem.

Points are awarded for applying relevant information from the additional information to the problem.

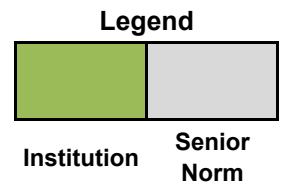

Q12 Use basic mathematical skills to help solve a real-world problem.

A points is awarded for performing a basic mathematical calculation needed to help solve a real-world problem.

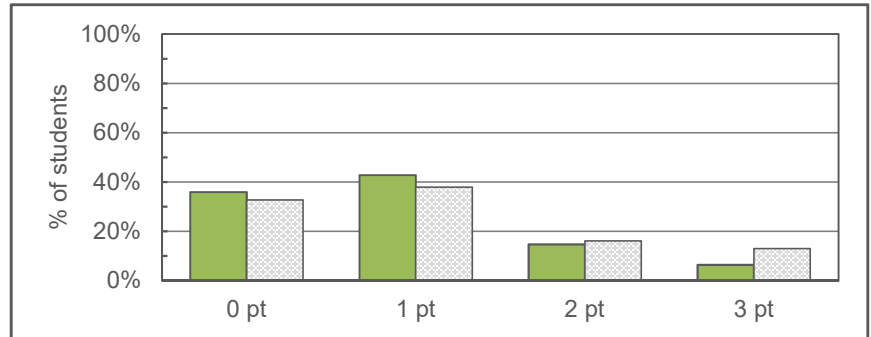

Frequency of Points Awarded on the CAT
Sam Houston State University: Spring 2021: All Students

Questions 10-15 present students with a real-world problem-solving task. In this section of questions, students will be asked to evaluate the relevance of available information, read relevant information, evaluate a suggested solution based on relevant information, solve a basic mathematical problem needed to solve the problem, identify a group of appropriate solutions, identify the best solution for a the problem situation, and identify changes to the problem situation that would change the solution. This set of questions aligns with CAT App Skill Set 2.

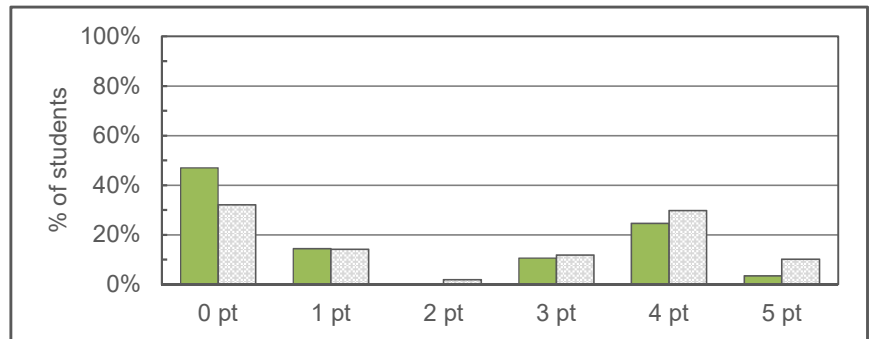

Q13 Identify suitable solutions for a real-world problem using relevant information.

Points are awarded for identifying viable solutions that could solve a real-world problem.

Q14 Identify and explain the best solution for a real-world problem using relevant information.

Points are awarded for identify and explaining the best solution to a real-world problem.

Q15 Explain how changes in a real-world problem situation might affect the solution.

Points are awarded for identifying a number of changes to the real-world problem situation and explaining how the optimal solution would change.
