**Navigating Ethical Dilemmas Experienced During
The Music Therapy Internship: A
Phenomenological Inquiry**

The purpose of this study is to describe the circumstances surrounding recent music therapy interns' experiences navigating an ethical dilemma during internship. Lack of data exists concerning how music therapy ethics are taught and a lack of detailed ethics-related competencies calls into question interns' possible preparation for addressing ethical dilemmas they may encounter during internship and more specifically, the factors surrounding their recognition of, and action taken toward resolving ethical dilemmas.
