COUNSELOR'S EXPERIENCES WITH SUCCESSFULLY INTEGRATING SEXUAL HEALTH INTO CLINICAL PRACTICE: A QUALITATIVE PHENOMENOLOGICAL STUDY

Historically, counselor research on sexual health integration has focused on the barriers counselors experience such as lack of comfort, lack of knowledge, and low-self efficacy. The voices of counselors who successfully integrate sexual health into their clinical practice is missing from this literature, possibly preventing comprehensive and ethical care.

This study explores their voices and experiences and provides recommendations for counseling training and education.

Event Information
June 30th, 2021
Time: 10:00AM
Location: Zoom
