Internal Grant Programs – General Overview
The internal grant programs at Sam Houston State University (SHSU) provide financial support for the creative activities and research of faculty and staff across all academic disciplines. These programs are administered through the Office of Research and Sponsored Programs (ORSP) at SHSU under advice of the Faculty Research Council.

The Faculty Research Council (FRC) serves as an advisory body to the Associate Vice President (AVP) for the Office of Research and Sponsored Programs (ORSP), and serve as stewards of the Internal Grant Programs. The FRC meets regularly with the AVP for ORSP to provide advice and strategic guidance on behalf of the SHUS faculty. The FRC also oversees the internal grant review process and the distribution of internal grant dollars to faculty and staff in order to support creative activities, facilitate the search for external grant dollars, foster interdisciplinary scholarship, and offer an opportunity to hone grant-writing skills through constructive review of proposals.

The FY19 internal grant program is divided into four programs – Individual Scholarship Program, New Faculty Program, Interdisciplinary Collaborations Program, and Pilot Studies for Future Funding Program. Faculty/staff should select the most appropriate program to meet the needs of their project and follow the specific instructions in the respective Request for Proposals (RFP). Applicants may apply to only one program.

Individual Scholarship Program
The Individual Scholarship Program is available to all tenured/tenure track faculty. This program is intended to support creative activities and/or research for tenured/tenure track faculty across all academic disciplines. These funds are meant to fund a single project with clear deliverables/products that will enhance the academic scholarship portfolio/CV of the applicant. The funds requested can be used to pay for any item required to execute the proposed project such as materials, supplies, consumables, travel, faculty salary and/or funds for student assistants. Eligible faculty interested in applying for these funds should closely follow the instructions detailed in the Individual Scholarship Program RFP.

Typical Award: $1,500-$3,000
Expected Funding: $40,000
Max Award: $5,000

New Faculty Program
The New Faculty Program is intended to provide partial, start-up support for tenure track faculty within their first 3 years of employment at Sam Houston State University (SHSU). These funds are intended to enhance the faculty's start-up package provided by the respective department and college, and to assist faculty in developing a long-term, sustainable scholarly program at SHSU that will secure a positive tenure vote. Thus, faculty may request funds for materials, consumables, supplies, travel, faculty salary
and/or funds for student assistants. However, faculty must clearly justify how the item(s) requested in this grant application will help kick-start their sustainable scholarly program. Eligible faculty interested in applying for these funds should closely follow the instructions detailed in the New Faculty Program RFP.

- Typical Award: $2,000-4,000
- Expected Funding: $60,000
- Max Award: $5,000

Interdisciplinary Collaborations Program
The Interdisciplinary Collaborations Program is intended to support collaborative projects among SHSU faculty. The proposed collaboration should be synergistic with each faculty member bringing a unique skillset needed to meet the goals/deliverables of the proposed work. The collaboration should enhance the scholarly experience for each investigator, increasing the skillset of all participants. Moreover, the quality and broader impacts of the work should be enhanced through this collaboration. These funds can be used to purchase most any item needed to execute the proposed project, but faculty must clearly justify how these funds are needed to foster the proposed collaboration. Eligible faculty interested in applying for these funds should closely follow the instructions detailed in the interdisciplinary Collaborations Program RFP.

- Typical Award: $7,000-$15,000
- Expected Funding: $60,000
- Max Award: $20,000

Pilot Studies for Future Funding Program
The Pilot Studies for Future Funding Program is intended to support pilot projects that will help scholars submit a competitive proposal to an external sponsor. Thus, the investigators must identify a specific grant program and/or funding opportunity to which they plan on applying. They must clearly describe the goals and design of the larger, external project and explain how the pilot project will enhance the quality external proposal. Funds in this category can be used for most any item needed to execute the pilot project, but it is critical to justify how these funds will contribute to the completion of the pilot project and clearly illustrate how the pilot project will enhance competitiveness of their proposal for external support. Eligible faculty interested in applying for these funds should closely follow the instructions detailed in the Pilot Studies for Future Funding Program RFP.

- Typical Award: $5,000-$10,000
- Expected Funding: $40,000
- Max Award: $15,000
Faculty Research Council Members

Contact a member of the FRC with questions regarding any of the grant programs above. Unfilled positions will be updated in early November.

College of Arts and Media
  1. Tony Boutté, School of Music
  2. TBA

College of Business Administration
  1. TBA
  2. TBA

College of Criminal Justice
  1. Jorn (Chi) Yu, Forensic Science
  2. TBA

College of Education
  1. Matt Fuller, Educational Leadership
  2. TBA

College of Health Sciences
  1. Jennifer Didier, Kinesiology
