Supplementary Materials for Science in Everyday Life

“The Dr. Joe Show” - Past Issues

For hundreds of questions and answers on science in everyday life, follow the link to PDFs available for free download: <http://oss.mcgill.ca/joeshow-a.php>

You can also see him regularly on the Discovery channel.

McGill Office for Science and Society

Dr. Schwarcz serves as Office Director for The McGill Office for Science and Society (OSS) which acts as the framework under which the Chemistry for the Public program operates. OSS is dedicated to disseminating up-to-date information in the areas of food, food issues, medications, cosmetics and health topics in general. This information is specifically directed towards the public, educators and students. The approach is multi-faceted and makes use of radio, television, the press, private consultations, public lectures, the classroom and the Internet. OSS is actively involved in Continuing Education at several levels. There are courses offered to the public dealing with issues of current interest ranging from nutrition and health care to various environmental concerns. Follow the link for lots more information: <http://oss.mcgill.ca/>
