

## Nutrition Major Grade Project

1. Carefully choose one partner
2. You will be assigned a species of animal and stage of production to focus on
3. Locate, print, and research at LEAST 3 various feeds that you would use (exp: Purina, Lindners, Moormans)
4. Create your own ration (you may NOT copy a ration that is printed)
  - you must include exactly what you will put it in
  - you must include why you chose what you did (what does that do for that animal's body)
  - name it
  - make a sack design and feed label
